

Problem Management V3

Objective: "To prevent problems and resulting incidents from happening, to eliminate recurring incidents, and to minimize the impact of incidents that cannot be prevented." (SO 4.4.1)

GENERAL PLATFORM CRITERIA

PinkVERIFY #	General Platform Criterion Assessment Question
Vendor Response	
PM-V3-G-001 (OGC ISS 2.1.23)	ITIL® Terms Does the tool use ITIL terms and definitions? E.g.: Problem records rather than 'tickets.'
Comment:	
PM-V3-G-002 (OGC ISS 2.1.18)	Problem Access Controls Does the tool allow access controls to open, modify and close Problems based on pre-established conditions?
Provide an overview description of the tool's security permissions' capability, structure and authority basis (e.g.: based on role, organization, location).	
PM-V3-G-003	Does the tool support designating fields as mandatory?
Provide an overview:	
PM-V3-G-004 (OGC ISS 2.1.21)	Additional Purchases Can the tool produce management reports without additional purchases such as consultancy or products?
Provide an overview:	
PM-V3-G-005 (OGC ISS 2.1.20)	Management Reports Does the tool produce reports from record detail captured? E.g.: total number of Problems over any given period, total number of active, closed, Changes initiated, number if Incidents addressed, problems by category, by user, by CI.
Provide an overview:	

Problem Management V3

Objective: "To prevent problems and resulting incidents from happening, to eliminate recurring incidents, and to minimize the impact of incidents that cannot be prevented." (SO 4.4.1)

PinkVERIFY #	General Platform Criterion Assessment Question
Vendor Response	
PM-V3-G-006 (OGC ISS 2.1.22)	Audit Trail Does the tool provide an audit trail of all Problem record updates for: a) ID of individual recording the update b) Date and time of the action c) Type of action
Describe:	
PM-V3-G-007 (OGC ISS 2.1.13)	Problem Functional Escalation Does the tool allow a Problem record to be escalated based on pre-established or manually overridden conditions? (Such as service level target, operational level target, business priority, support tier)
Describe:	
PM-V3-G-008	Does the tool provide facilities within the tool database for storing or archiving closed records?
Describe:	

Problem Management V3

Objective: "To prevent problems and resulting incidents from happening, to eliminate recurring incidents, and to minimize the impact of incidents that cannot be prevented." (SO 4.4.1)

CORE CRITERIA

PinkVERIFY #	General Platform Criterion Assessment Question
Vendor Response	
PM-V3-C-001 (OGC ISS 2.1.3)	Problem Unique Reference Does the tool automatically allocate a unique reference to newly created records at the time of opening the record?
Describe (can include screenshots):	
PM-V3-C-002 (OGC ISS 2.1.1)	Problem Vs Incident Does the tool differentiate between Incidents and Problems?
Describe (can include screenshots):	
PM-V3-C-003 (OGC ISS 2.1.4)	Problem Date & Time Is each Problem record date and time stamped when created and again each time the record is updated?
Describe (can include screenshots):	
PM-V3-C-004 (OGC ISS 2.1.5)	Problem Source Does each Problem record contain a field or fields to display the identity of the source of reporting of the Problem (event trigger, person, group)?
Describe (can include screenshots):	
PM-V3-C-005 (OGC ISS 2.1.6)	Problem Contact Details Does each Problem record contain a field or fields to display the contact information?
Describe (can include screenshots):	

Problem Management V3

Objective: "To prevent problems and resulting incidents from happening, to eliminate recurring incidents, and to minimize the impact of incidents that cannot be prevented." (SO 4.4.1)

PinkVERIFY #	General Platform Criterion Assessment Question
Vendor Response	
PM-V3-C-006 (OGC ISS 2.1.2)	Problem Logging Manually Can Problem records be created manually?
Describe (can include screenshots):	
PM-V3-C-007 (OGC ISS 2.1.9)	Problem Categorization Does the Problem record contain hierarchical category fields to record the type of Problem (Such as hardware, server, memory)?
Describe (can include screenshots):	
PM-V3-C-008 (OGC ISS 2.1.11)	Problem Assignment Does the Problem record contain a field or field(s) to assign the Problem to a support department, group or individual?
Describe (can include screenshots):	
PM-V3-C-009 (OGC ISS 2.1.10)	Problem Prioritization Does the Problem record contain a field or field(s) to assign an initial Problem priority according to pre-established or manually overridden conditions? (Such as CI type, Business Services impacted, level of service disruption, security breach, cost to fix)
Describe (can include screenshots):	
PM-V3-C-010	Does the tool support changing the impact and / or urgency fields and associated priority? For example: based on the associated incidents being matched to the problem change impact and priority
Describe (can include screenshots):	
PM-V3-C-011 (OGC ISS 2.1.8)	Problem Status Does the Problem record contain a field or fields to record the status of the Problem (Such as active, waiting, closed)?
Describe (can include screenshots):	

Problem Management V3

Objective: "To prevent problems and resulting incidents from happening, to eliminate recurring incidents, and to minimize the impact of incidents that cannot be prevented." (SO 4.4.1)

PinkVERIFY #	General Platform Criterion Assessment Question
Vendor Response	
PM-V3-C-012 (OGC ISS 2.1.7)	<p>Problem Symptoms Does each Problem record contain a field or fields to describe the symptoms of the fault? This can include event parameters and/or user reported.</p>
Describe (can include screenshots):	
PM-V3-C-013 (OGC ISS 2.1.12)	<p>Problem Diagnosis Details Does the Problem record contain a field or fields to sequentially record diagnostic activities?</p>
Describe (can include screenshots):	
PM-V3-C-014 (OGC ISS 2.1.14)	<p>Problem Resolution Date & Time Do Problem records have a field or fields to record Resolution Information including data and time?</p>
Describe (can include screenshots):	
PM-V3-C-015 (OGC ISS 2.1.24)	<p>Problem Lifecycle Status Does the tool show the Problem lifecycle stage? E.g.: that the Problem is being diagnosed, has been escalated, resolution is being applied or has been closed.</p>
Describe (can include screenshots):	
PM-V3-C-016	<p>Does the tool facilitate the escalation and notification of problem records being worked on after defined thresholds have been reached? E.g.: failure to establish a root cause before a pre-define period</p>
Describe (can include screenshots):	

Problem Management V3

Objective: "To prevent problems and resulting incidents from happening, to eliminate recurring incidents, and to minimize the impact of incidents that cannot be prevented." (SO 4.4.1)

PinkVERIFY #	General Platform Criterion Assessment Question
Vendor Response	
PM-V3-C-017 (OGC ISS 2.1.16)	Problem Resolution – Known Error Does the tool allow a Known Error record to be created and for that information to be visible elsewhere? (Such as CI records, Incident Records, Change Records, Knowledge data and service reports)
Describe (can include screenshots):	
PM-V3-C-018 (OGC ISS 2.1.17)	Problem Resolution – Known Error Does the tool allow a Known Error record to be created in the development environment and for that information to be visible elsewhere (such as CI records, Incident Records, Change Records, Knowledge data, service reports).
Describe (can include screenshots):	
PM-V3-C-019	Does the tool provide access to historical problem and known error data / information for use by support staff during incident and problem investigation?
Describe (can include screenshots):	
PM-V3-C-020 (OGC ISS 2.1.19)	Problem Closure Does the Problem record contain a field or fields to record Closure categorization?
Describe (can include screenshots):	

Problem Management V3

Objective: "To prevent problems and resulting incidents from happening, to eliminate recurring incidents, and to minimize the impact of incidents that cannot be prevented." (SO 4.4.1)

INTEGRATION CRITERIA

PinkVERIFY #	General Platform Criterion Assessment Question
Vendor Response	
PM-V3-I-001	Does the tool facilitate the creation and maintenance of the linked relationships between Incident Records and associated Problem / Known Error Record(s)?
Describe (can include screenshots):	
PM-V3-I-002	Does the tool facilitate incident trending for pro-active problem identification? E.g.: the ability to show historical, related incidents over time
Describe (can include screenshots):	
PM-V3-I-003 (OGC ISS 2.1.15)	Problem Resolution – Workaround Does the tool allow Problem resolution to include a workaround and for that information to be visible elsewhere? (Such as CI records, Incident Records, Knowledge data, service reports).
Describe (can include screenshots):	
PM-V3-I-004	Does the tool integrate with Change Management to enable the opening of a Request for Change Record based on a Problem / Known Error Record; and to enable the creation and maintenance of the linked relationships between the Problem and Known Error Record(s) and associated Change Record(s)?
Describe (can include screenshots):	

Problem Management V3

Objective: "To prevent problems and resulting incidents from happening, to eliminate recurring incidents, and to minimize the impact of incidents that cannot be prevented." (SO 4.4.1)

PinkVERIFY #	General Platform Criterion Assessment Question
Vendor Response	
PM-V3-I-005	Does the tool integrate with Configuration Management Systems and Configuration Management Databases (CMDBs) to enable the creation and maintenance of the linked relationships between Problem and Known Error Records, and associated Configuration Item Records?
Describe (can include screenshots):	
PM-V3-I-006	Does the tool integrate with Configuration Management Systems or CMDBs to enable the problem support team(s) to identify, investigate, diagnose and eliminate problems?
Describe (can include screenshots):	
PM-V3-I-007	Does the tool integrate with Knowledge Management - knowledge databases to support investigations, diagnoses, root cause analysis techniques, and creating / updating workarounds, temporary fixes and resolutions?
Describe (can include screenshots):
